

Dear Sir,

I do not yet own a satellite radio, but you must know that it serves a real need in some areas. I travel from Houston to the Rio Grande river quite often and there is no radio in 70% of that trip. Also this is an issue that is just one more advance in our great world. Compatition may make some of these old ways obsolete. We don't have steam boats any more eather.

Thank you,
Rich Prentice
